NMSI's Laying the Foundation Program for teachers of grades 6-10, provides math, science, and English teachers with the best content-based, pedagogy-driven, teacher-to-teacher training. Training is held in the proper environment for the subject. We help educators with teaching strategies and content knowledge that increase rigor in the classroom and are aligned with state standards. Our training is more than just another professional development session; it's an event that offers educators a variety of opportunities to strengthen their knowledge and practice.
